Handy-Alarm.com

PRODUCT OVERVIEW
03 NOV 2026

SUPPLEMENTARY DIGITAL ALERTING

Alerting. Responses. A shared picture.

Handy-Alarm complements your existing alerting channels. Incident information reaches the intended responders, with availability responses and a shared view of the situation.

FIRE SERVICES / THW / WATER RESCUE / EMERGENCY MEDICAL SERVICES

FROM THE FIRST ALERT TO THE RESPONSE

01

Connect

Incident fax and email, five-tone / POCSAG, FMS32 / BosMon, and calls, SMS or links. We discuss the right connection and any individual requirements with you before setup.

02

Notify

Push in the free app, SMS, email and voice calls: choose suitable channels and recipients for your organisation. Appropriate channels can also include members who do not use a smartphone.

03

Respond

Members report their availability. Incident type, location and further information help them prepare. Directions to the incident can be opened on their mobile device.

Keep your organisation in view.

Manage members and groups centrally, select recipients by role and organise multiple organisations. An optional incident display complements information on individual smartphones with a shared view on a screen at your station.

THE BASE OFFER

€19.99 / month

including statutory VAT
No setup fee.

We agree the scope, optional services and any delivery charges for SMS or voice calls with you in advance.

An addition to your existing alerting system

Handy-Alarm is a supplementary information and alerting channel. Mandatory public-safety (BOS) alerting remains authoritative. Delivery also depends on mobile networks, devices and service providers.

Your alert source. Let’s talk.

Discuss the connection, setup and a trial with us personally.
